**Response Rate** 8/52 (15.38%)

- Nil
- Such an awesome course, I was way over my head but the Professor was super reasonable with grading. I sincerely enjoyed and continue to enjoy the coursework despite having no prior experience. The TAs are all awesome and amazingly talented at what they do.
- professor is overall excellent
- Excellent class. This class distinguishes Columbia University from its peers. I really like this class. Hope to see more competitive programmers could join,
- This is my favorite class that I've taken at Columbia, and I look forward to attending the practice sessions and working on these problems each week. Professor Lim is an excellent professor, and I've learned a ton from him over the past few months.
- Although the grading is very friendly if you put in consistent effort, the problems introduced in the class are very difficult. Don't expect to understand how to do over 80% of the problems unless you have solid CP experience. The problems were a humbling experience and have made me strive to become a better problem solver. I also took this class concurrently with Algos, which really helped some of the concepts click a little better.
- By far the most useful course I have taken during my academic career
- The course is definitely time-consuming but it is extremely valuable. There are not many university courses like this at other top schools – it is truly unique and I am very glad it is offered at Columbia. It is very difficult but Yongwhan makes a point to ensure that students get enough guidance and mentorship to succeed. He only expects students to not give up, and if they don't, they will receive the right grade.

### 11 - If so, please explain why

Yongwhan Lim

Response Rate	17/52 (32.69%)
<ul style="list-style-type: none"> <li>• Easily the most caring professor I've ever had. Also the smartest.</li> <li>• Professor Lim really cares about the personal development of students, and is willing to go the extra mile to help students achieve their goals!</li> <li>• Very committed to seeing his students succeed academically and in their careers. Very kind, knowledgeable, encouraging and caring.</li> <li>• He really goes above and beyond for his students, he is superhuman in his level of dedication. He's flying all over the world, teaching and meeting with us at all hours, for free.</li> <li>• the course structure is well-organized and well designed for us, learnt a lot</li> <li>• One of the most real-world knowledge intensive courses I have taken, and the professor was very approachable and went above and beyond to make each and every student reach their potential</li> <li>• He has vast experience and he is skilled in what he does.</li> <li>• Excellent teaching, fantastic class</li> <li>• Professor really cares about us and is extremely supportive.</li> <li>• He is very smart and elegant. As a student who organized similar kind of club in my undergrad school, I know how difficult it is to set up the lecture series without much outside support and incentives. The class is quite hard, as it is not easy by default, but I appreciate his effort on keeping doing every lecture and lead practice contest.</li> <li>• Professor Lim is my favorite professor and this is by far my favorite class that I've taken at Columbia. I've heard a similar sentiment echoed many times from students after class/in the practice sessions as well.</li> <li>• Yongwhan is extremely professional and nice. He is not only super smart and interesting, but he also cares a lot about his students. He always takes constructive feedback and keeps improving the course. He is an excellent teacher.</li> <li>• Extremely hard working and very approachable</li> <li>• I've never met a professor (or person honestly) that's so benevolent in helping others. He literally takes meetings with students to go over their resumes and general professional lives in the wee hours of the night, as he works a full time job IN ADDITION to teaching classes. His work ethic and dedication to mentorship truly exemplifies the SEAS' mantra of engineering for humanity.</li> <li>• Professional and easygoing</li> <li>• The amount of effort he puts in to make sure his students succeed.</li> <li>• Yongwhan truly cares about his students more than any other professor I have seen at Columbia. He approaches teaching as an opportunity for mentorship – he actively seeks to help students in their academic and professional journeys. He sacrifices his sleep and free time to hold office hours for students where he can give them advice, mock interviews, etc. that are all extremely helpful. He offers invaluable guidance that can not be found elsewhere and he is truly one of the best professors I have had at this school.</li> </ul>

#### Kaiheng Dai

<b>Response Rate</b>	6/52 (11.54%)
----------------------	---------------

- Kai is the best TA ever!!!!
- Super smart, amazing at CP, also a great instructor and problemsetter.
- The TA is excellent overall
- Kai is a miracle. He knows what he want and has the ability to turn his idea into reality. He is very skilled in competitive programming.
- Kai is a fantastic TA! I've had the opportunity to learn from him in office hours on many occasions, and he is clearly very knowledgable about CP topics. He is incredibly effective at teaching those concepts to the class. He is also very approachable and kind.
- Really Amazing!

- Also super smart, amazing at CP.
- The TA is excellent overall
- He is very smart and friendly. He really cares about the others and often reach out to help his peers. I would say he is as elegant and friendly as any of the other TAs.
