- Amazing course!
- Great class for helping you learn more about algorithms and acing your interviews. Columbia desperately needed a class like this
- This course should be a core requirement for CS majors. It gives students very practical real-world skills that will help them integrate into the job market.
- The course is very helpful for algorithm training!
- Thanks for your weekly grading!!!
- I feel so much more equipped to handle tech interviews

11 - If so, please explain why
Yongwhan Lim

Response Rate	16/48 (33.33%)

• Yongwhan Lim is amazing! He has changed the way I view myself. Taking his course has been the greatest academic experience I have ever had. Yongwhan Lim has changed my life.

• Really helpful

• One of the most caring professor's you will ever meet. You can tell he teaches us because he loves what he teaches. Literally the best professor at this university who goes above and beyond to connect with every student. You will find no other professor at Columbia who spends this much time and effort into teaching, preparing, and caring for their students

• Professor Lim has dedicated so much time, effort. and positive attitude into each and every one of his students. He goes far beyond his commitments for as a professor, and meets each student individually to mentor and help them. He is also very professional and know everything there is to know about what he teaches. I am lucky to take this class and get a professor like Prof. Lim.

• The professor is very helpful and approachable. He provided unlimited support to our career seeking/planning process.

• Dr Lim is a perfect professor and help us a lot! I hope there will be more such course and full-stack/OOD courses for SEAS students, which will be excellent for us to find job!!!

• Prof. Lim is easily the most approachable and helpful prof. I ever had throughout my education.

• He is helpful, supportive, and cares a lot about students' success. He is very approachable, even sacrificing his personal time to have 1:1 meetings with students. Many of us are able to secure a job offer with his help, even in this hard times. I would definitely recommend Yongwhan and this course to my friends.

• Full of knowledge in this field and very approachable.

• He is quick to repond to student issues, emails, messages, and creates a very friendly atmosphere.

• Professor Lim was so dedicated in providing us the best support to help us improve our technical interview skills. The course structure is unique and different from any other courses I ever took, with lots of opportunities to force myself to get out of the comfort zone and practice in a real interview circumstance. Professor Lim also provided lots of resources like ICPC practice, 1-on-1 meeting, and etc, from which I benefit a lot.

• He really cares about the success of every single student!

• One of the most accommodating and knowledgeable professors, who always offers personal help to students.

• Professor Lim fully devotes himself to his student's success, and it is very clear to all of us. He is willing to go beyond his responsibilities as a professor and take the role of a career coach to help students achieve their full potential. Thanks professor Lim!

• Super supportive and responsive, genuinely cares about students' success and wellbeing. I learned a lot in the course and think it's very useful and practical.

• The most approachable professor I have ever seen in my life and also other people's lives. Always helpful
